

Data Flow Diagram — Level 0

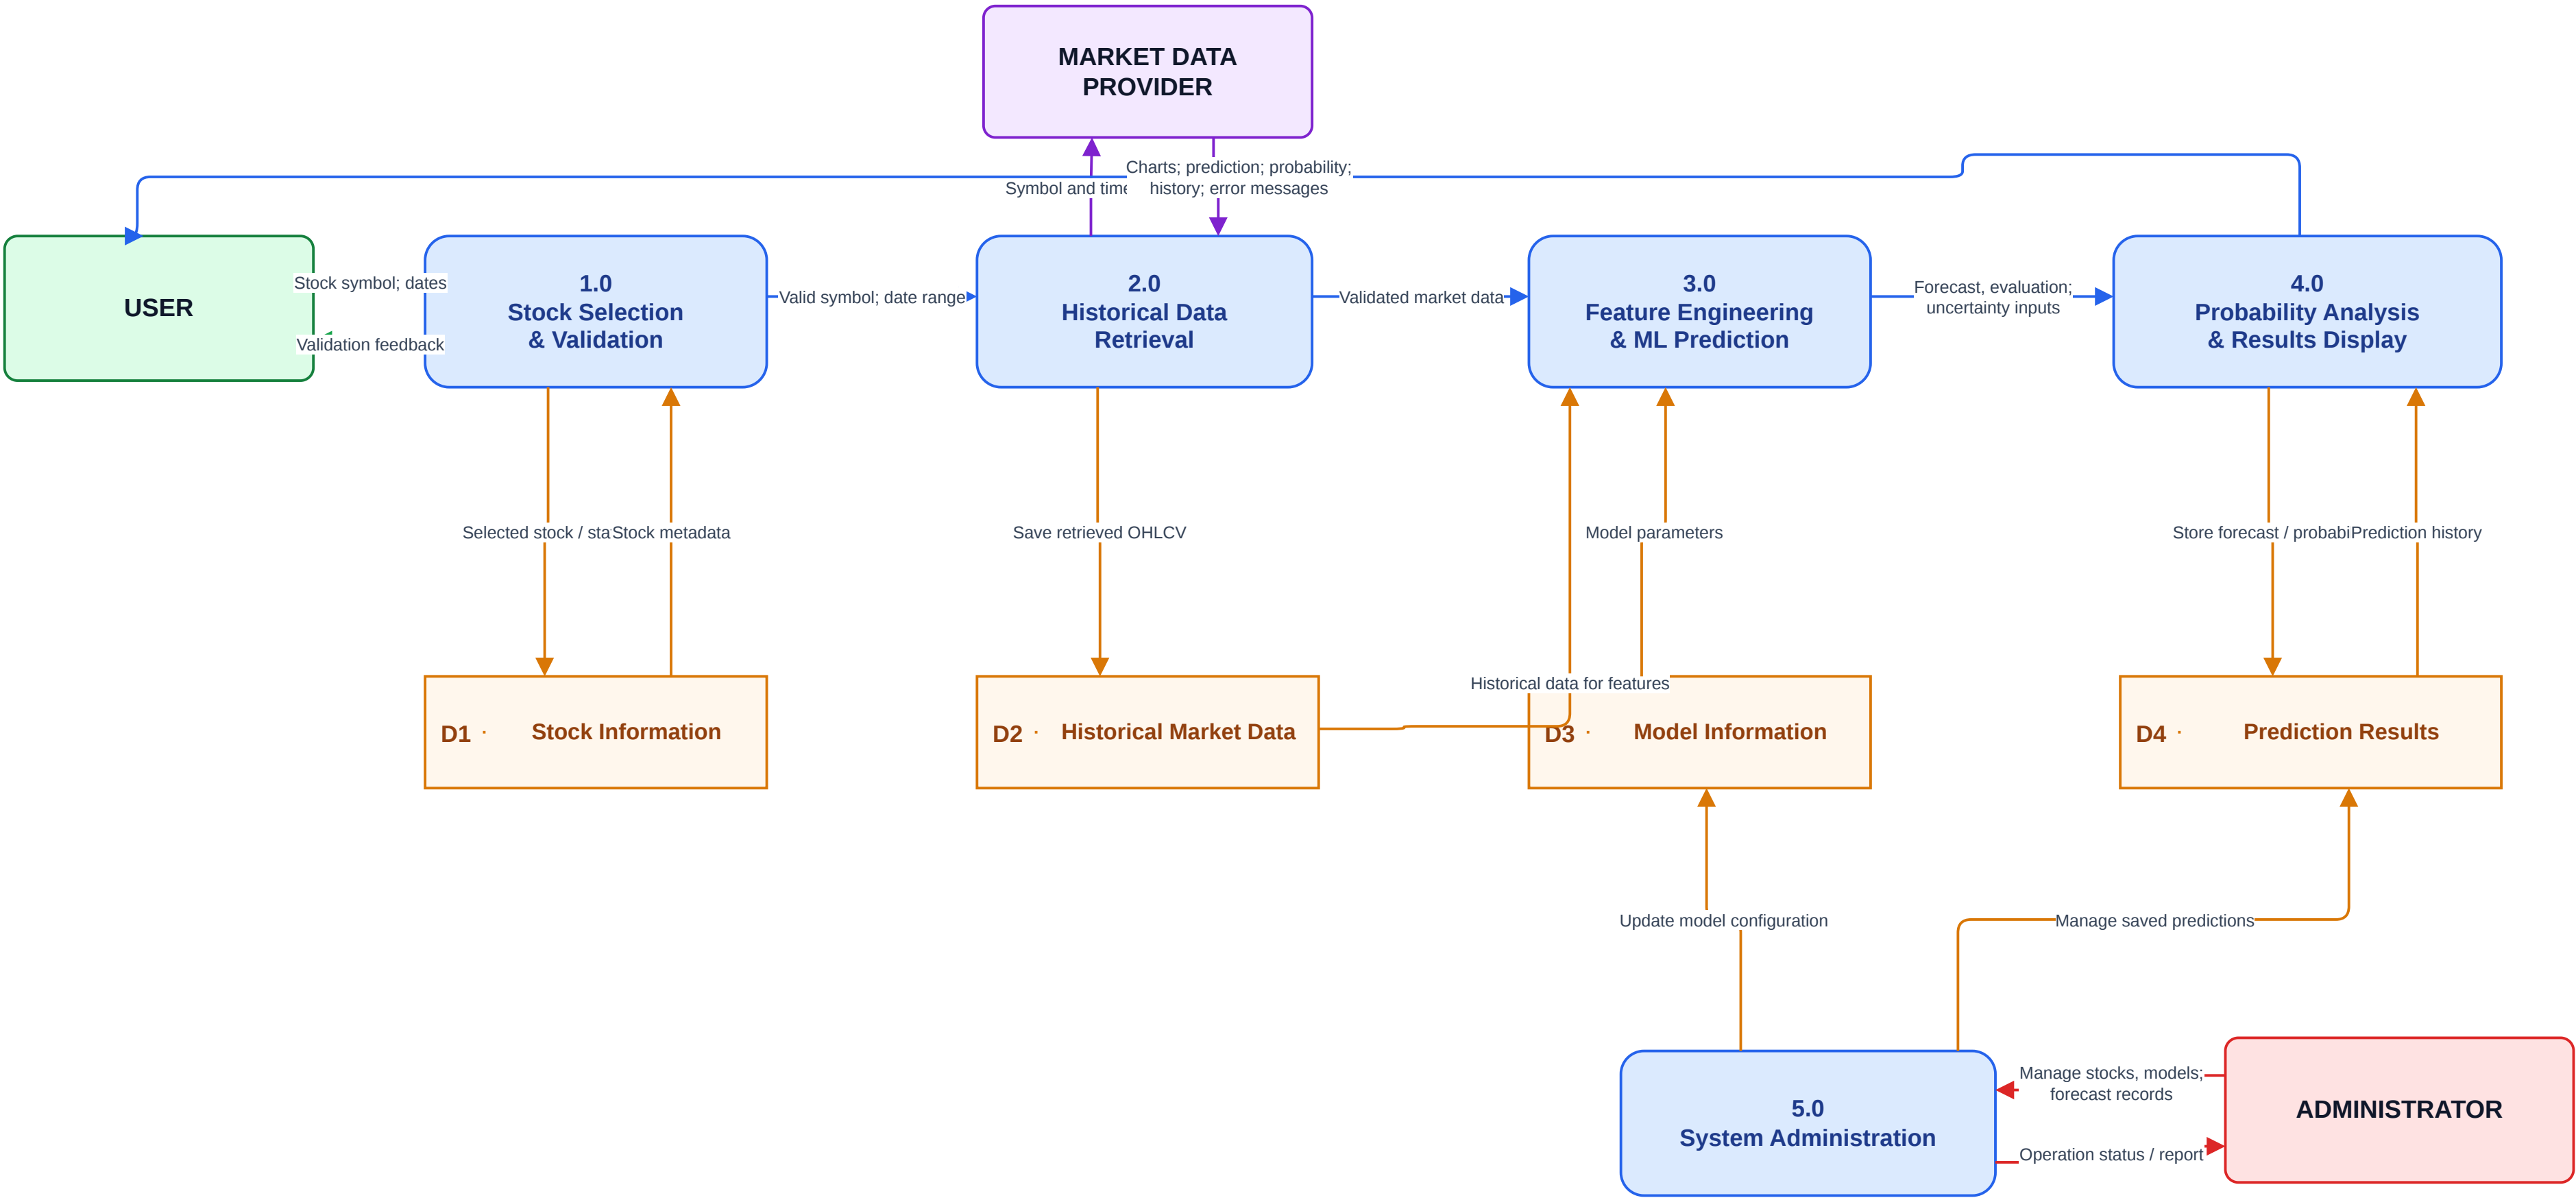

Context diagram | Stock Market Prediction System

Level 0 shows external users and services and the information exchanged with the system. Internal processes and data stores appear on the Level 1 page.

Data Flow Diagram — Level 1

Detailed processes, data stores and external actors | Proposed full-system workflow

Legend: Blue = internal process | Green / purple / red = external actor | Orange = logical data store | Arrow = data flow
The diagram represents the proposed full solution. Sprint 1 demonstrated stock selection, retrieval and validation; prediction, history and administration are planned capabilities.
